

Water Jetting Operations

ASIA JETTING SOLUTIONS
for all your jetting needs...

AJS eliminate the risk of exposure to high pressure water by utilising innovative automated technology. e.g. The Rotorcar, excellent for aqua-milling and descaling work.

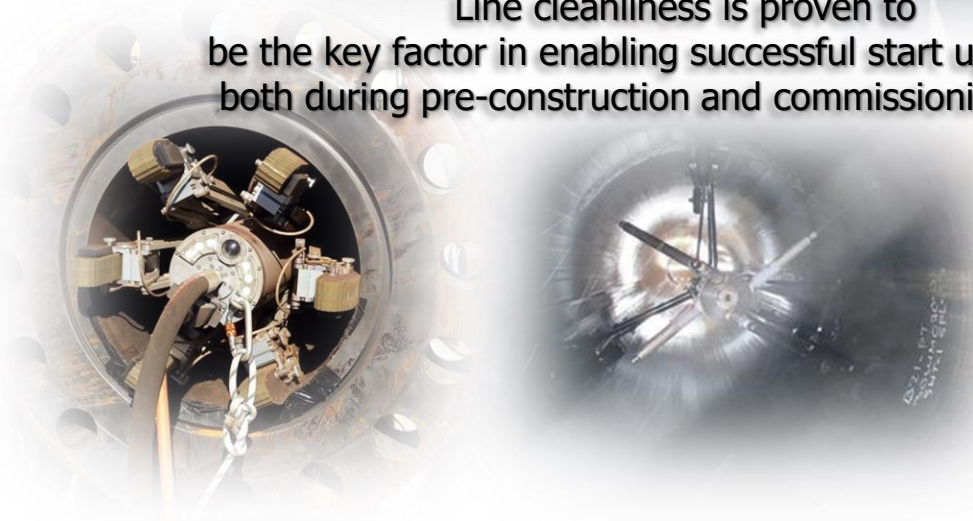

WATER JETTING OPERATIONS

RETRO JETTING

Using the automated hose control Autobox with pipeline tools BJV Badger, Goffer and Banshee from Stoneage. We can clean pipes from 15mm to 750mm with up to 4 bends from the entry point . Fitted with a back out preventer it removes the risk of operator injury.

Line cleanliness is proven to be the key factor in enabling successful start up practices, both during pre-construction and commissioning phases.

Water Jetting Operations

ASIA JETTING SOLUTIONS

for all your jetting needs...

Using the latest patented technology in Pipeline Descaling / Cleaning and Air blowing AJS can save time and money on your projects.

AJS utilises automated technology that removes the operator from the cleaning head.

WATER JETTING OPERATIONS
